

BĀZĀR

A World-Goods Resale Shop

UI Case Study

My Role

- Project concept
- Low-fidelity sketches
- Multiple iterations based upon user feedback
- Design: color, hierarchy, typography
- Photo curation and enhancement
- Logo design
- Mid-fidelity wireframes
- Prototype, iterations based upon user feedback
- Final design screens

Overview

An e-commerce site inspired by colorful collections of fabrics, masks, buddha statues, sari fabrics, and wood carvings from adventures of the global nomad.

Ready to de-clutter?

Don't discard it... share it with someone new!

Challenge

How can buyers and sellers post items for sale to a niche community of global citizens?

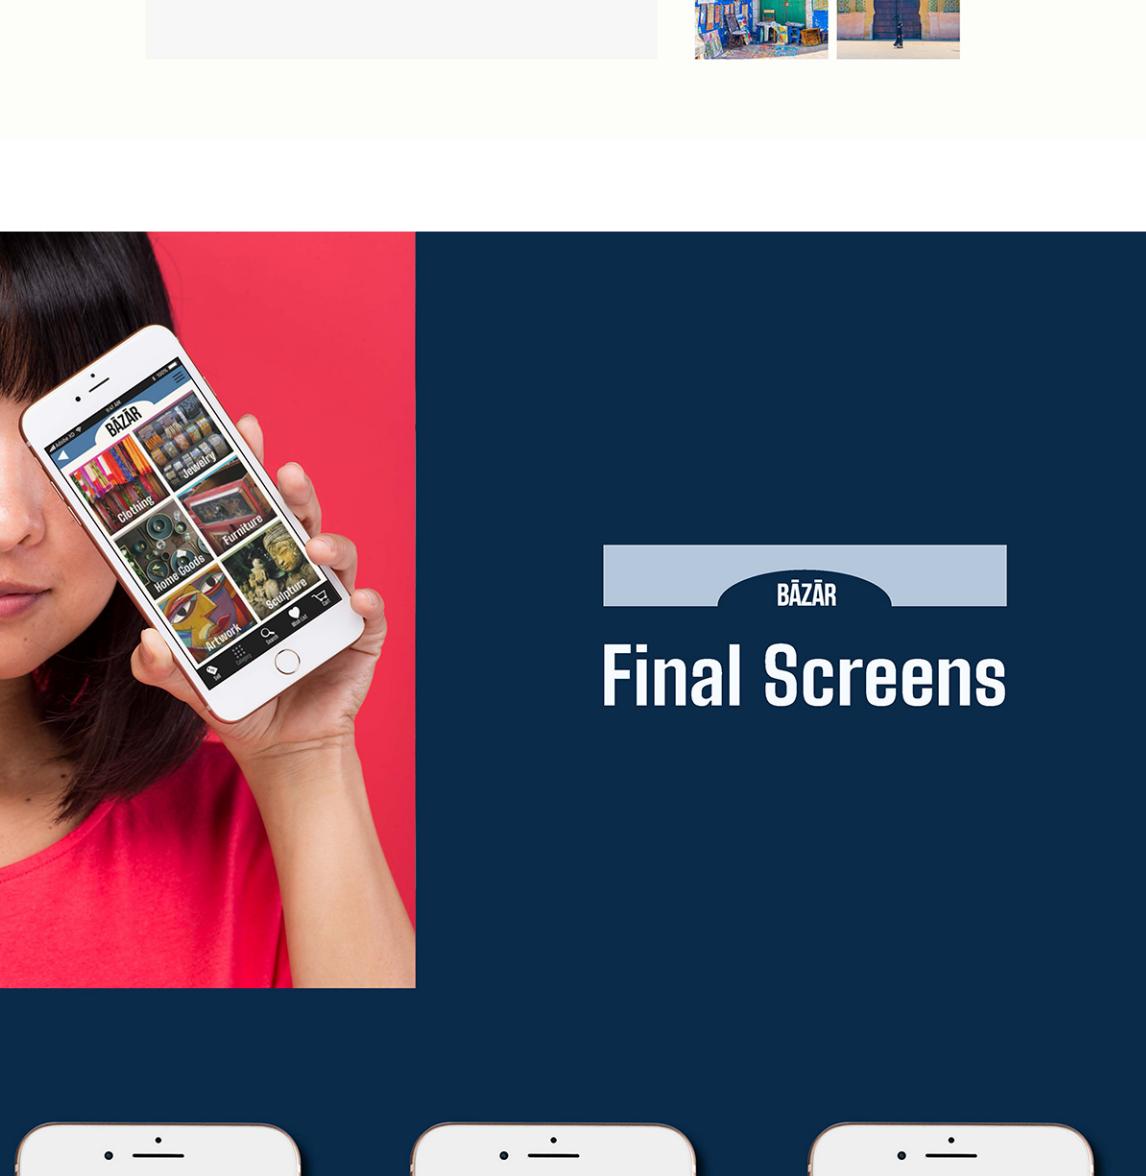

Result

Curated content by global-nomad sellers. Bazaar is a web app that is available to anyone looking to purchase a unique item that they would not ordinarily find without traveling to an exotic destination.

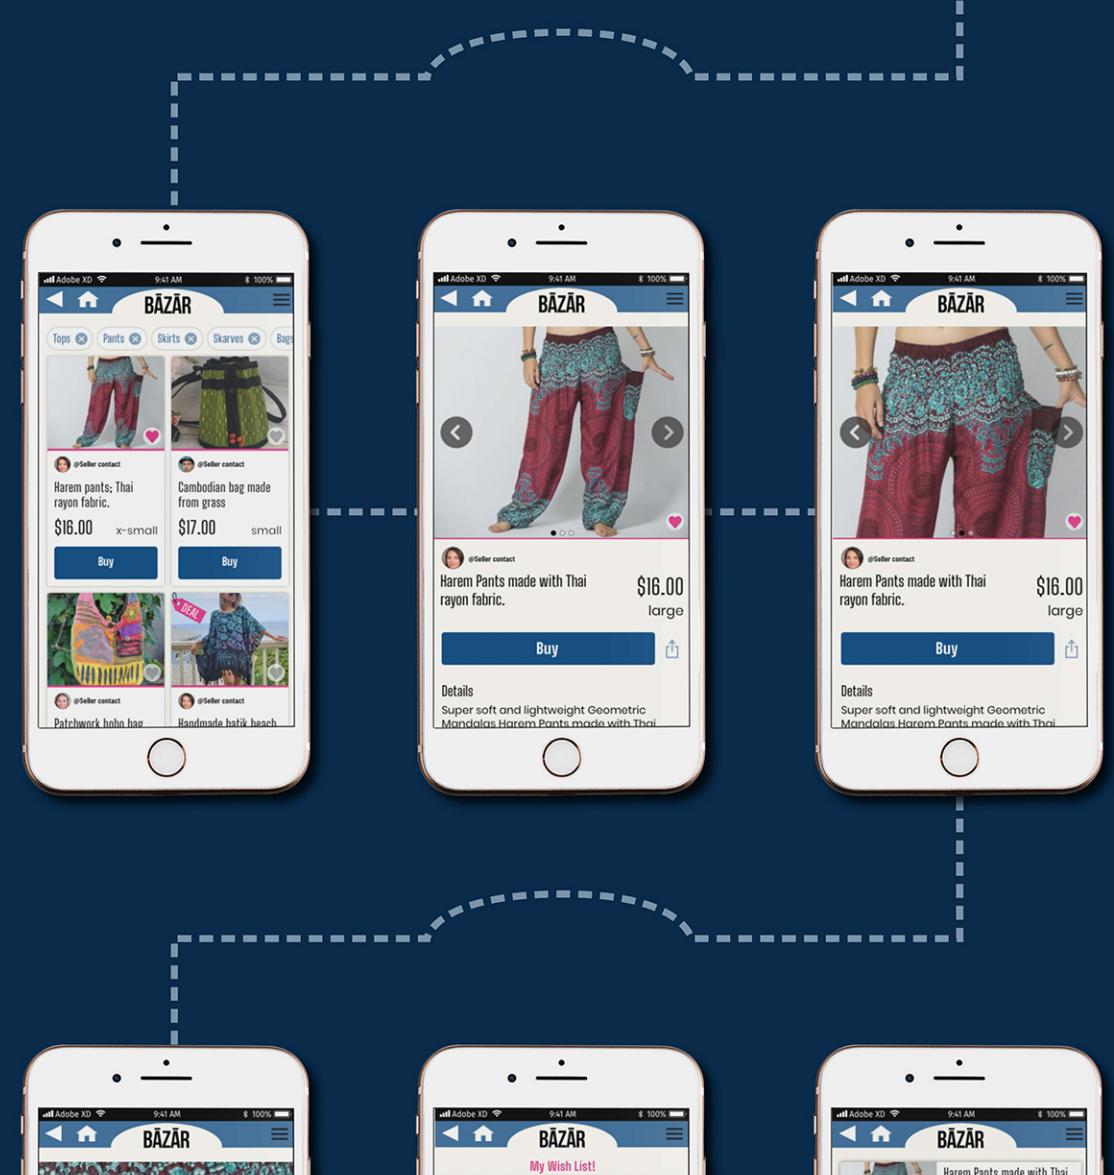

Development

Low-Fidelity Sketches

Mid-Fidelity Wireframes

Design

Color Palette

Colors for this palette were chosen from the photos curated for the brand of the site.

Because the listings are not curated for photo quality, the Home screen needs strong, vibrant, eye-catching photos, but the product screens need less color due to the posting of photos by sellers.

I chose the dominant color to be blue which evokes reliability and trust.

Typography

Big Shoulders

AaBbCc

Logo & Header Graphic

"A large shop selling items out of the ordinary."

BĀZĀR

large shop selling miscellaneous items

sounds like "bizarre" = strikingly out of the ordinary

Header Graphic

The header graphic for the web app was derived from the archways seen in the various shopping plazas and in exotic locations.

Final Screens

Thanks for Visiting BĀZĀR
